

# THE COVID-19 IMPACT: Emerging Cybersecurity Risks in the Parking Industry

## AGENDA TOPICS

- Technology-specific vulnerabilities and risks
- Network security and segmentation
- IT processes: backup/recovery, physical security, policies/procedures, user security awareness
- Impact(s) of COVID
- Impact(s) of Data Breach
- Revenue and Budget Impacts
- Parking Executive Responsibility and Governance and budget development
- Incident response planning

Cyber attacks are on the rise. More data is being stolen. Ransomware incidents are occurring frequently. And a significant number of viruses are infecting our computers.

While cybersecurity is addressing the need for computer security, most parking and transportation professionals still don't have a solid understanding of what policies and procedures they should follow to protect their computer systems from future attacks.

That's why CPMA has partnered with Paul Ashe of Securance Consulting to ensure that its members are aware of what it takes to protect their computer systems and what current and future leading practices might look like.
